

## What we stand for:

- Scientific and rational handling of cannabis
- Recognition of cannabis as a medicine in Switzerland
- Simplified patient access and convenience for prescribers
- Cooperation with research, teaching, pharmacies and industry
- Pragmatic legal regulations

## SGCM-SSCM

Schweizerische Gesellschaft für Cannabis in der Medizin  
Swiss Society of Cannabis in Medicine  
Société Suisse du Cannabis en Médecine  
Società Svizzera di Cannabis nella Medicina

## Who we are:

- Professionals from medicine, pharmacy, pharmacology, research and industry - all united in the goal of destigmatizing cannabis and making it usable as a drug.
- We maintain a good and close cooperation with the Federal Office of Public Health (BAG) in order to be able to support the medicalization of cannabis in an interprofessional and active manner.

## Why we are needed:

- There are currently no problem-oriented treatment recommendations for Switzerland - we work together to guidelines, based on scientific evidence and clinical experience.
- The national network is immensely important and valuable - we have close contacts in many professional fields and in all parts of the country for many years.
- Well-understandable patient informations must be made easily accessible - we are working hard on this too.
- International partners allow us to learn from and with others - we are the Swiss Ambassador Society of the IACM (Intern. Association for Cannabinoid Medicines).

## We want you as member, if ...:

- You are a specialist in medicine, pharmacy, pharmacology or research.
- You have experience in the medical use of cannabis and cannabinoids - and would like to share your knowledge with others.
- You find the topic exciting, but so far have no idea what preparation or what dosage makes sense to your patients.
- You also think that we have to take advantage of the unique opportunity to politically and medically establish a new regulation.
